

Educational Organization Using ServiceNow

Team ID	LTVIP2026TMIDS66826
Project Name	Educational Organization Using ServiceNow
Faculty Mentor Name	Dr P L Madhava Rao
College Name	Kallam Haranadhareddy Institute of Technology

Project Planning Phase

This file explains how the project is broken down into smaller tasks to make development easier and more organized. Planning the steps in advance helps avoid confusion and ensures steady progress.

Work Plan (WBS – Work Breakdown Structure)

The entire project is divided into these main stages:

1. Requirement Gathering

Understand the needs of users and decide what features to include in the system.

2. Form and Table Design

Create forms (like student and admission forms) and define custom tables in ServiceNow to store the data properly.

3. Workflow and Logic Development

Build workflows to manage the admission process and scripts to calculate totals and percentages automatically.

4. Testing and Debugging

Check that all forms and features are working correctly. Identify and fix any errors or missing parts.

5. Documentation Preparation

Create a project report, include screenshots, and explain how the system works.

Timeline Estimation:

This section shows how much time is expected to be spent on each major phase of the project. It helps the team plan their work and avoid delays by allocating enough time for each task.

Phase	Estimated Time
Setting Up Instance	1 hour
Update Set Creation	30 mins
Table Creations	2 hours
Relationships & Lists	1.5 hours
Business Rules	2 hours
Final Testing & Conclusion	1 hour
